CARAFE[™]

User Guide

Welcome To Wellness

*Congratulations on your purchase of a Wellness Carafe.
You now have... The Best Source of Water on Earth®.*

Instructions

...for the proper use and care of your Wellness Carafe.

- Before use, hand wash the Wellness Carafe, reservoir and lid. Rinse well.
- Open the filter bag. Insert white plastic ring found in the bag into the reservoir's center opening.
- Place the filter cartridge snugly over the white plastic ring.
- Place the blue reservoir into the pitcher, lining up the reservoir's spout indicator with the spout on the pitcher.
- The filter cartridge will filter approximately 40 gallons/150 liters of water or 160 quart fills of the top reservoir.

IMPORTANT: Fill the reservoir with tap water, flushing out the harmless carbon dust from your new filter. The carbon dust is a normal occurrence in filter manufacturing and will disappear after one or two flushings. Discard it or use this water for your plants.

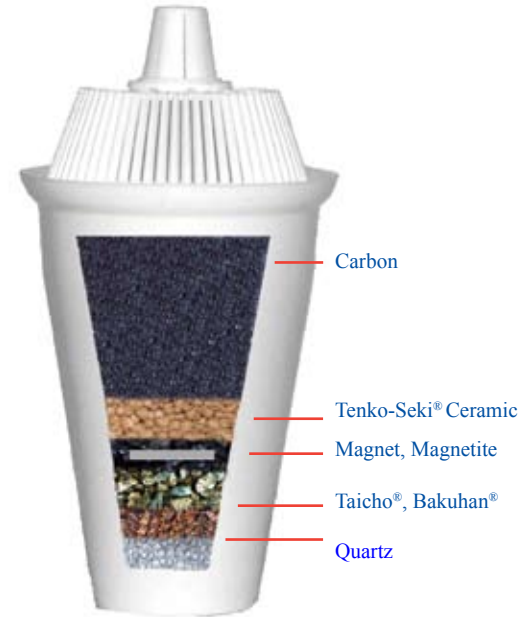

- Refill your pitcher with tap water, and store it in your refrigerator* for cold, fresh, great tasting water anytime you want it, replenishing the reservoir as required.

It is recommended that you wash your unit each time you replace your filter, in order to keep the water tasting its best.

NOTE: Use The Wellness Carafe only for filtering potable tap water that is municipally treated and microbiologically safe to drink. People with specific water purity needs should consult with their physician before using any water filtration system. Do *not* filter hot water (85°F / 30°C).

**It is not required to store Carafe in refrigerator, only desirable for cold water.*

Wellness Carafe™ Filtration and Enhancement Cartridge Specifications

By using your new Wellness Carafe, you'll enjoy an improved refreshing taste over regular unfiltered tap water. Drink filtered water on its own, or use it when making coffee, tea or any other mixed beverage.
